4.4.3. Training the model

4.4.4. The full training loop

4.4.5. Chapter conclusion

Summary

Chapter 5. Tackling more complex problems with actor-critic methods

5.1. Combining the value and policy function

5.2. Distributed training

5.3. Advantage actor-critic

5.4. N-step actor-critic

Summary

2. Above and beyond

Chapter 6. Alternative optimization methods: Evolutionary algorithms

6.1. A different approach to reinforcement learning

6.2. Reinforcement learning with evolution strategies

6.2.1. Evolution in theory

6.2.2. Evolution in practice

6.3. A genetic algorithm for CartPole

6.4. Pros and cons of evolutionary algorithms

6.4.1. Evolutionary algorithms explore more

6.4.2. Evolutionary algorithms are incredibly sample intensive

6.4.3. Simulators

6.5. Evolutionary algorithms as a scalable alternative
