add_spots function
add_to_replay function
adjacency matrices
advantage actor-critic
afn parameter

agents
  defined
  interacting with environment
  multi-agent reinforcement learning
    1D Ising model
    2D Ising model
    mean field Q-learning
    mixed cooperative-competitive games
    neighborhood Q-learning
AGI (artificial general intelligence)
AlphaGo algorithm, 2nd, 3rd, 4th
AlphaZero algorithm
Amazon SageMaker
arange function
argmax function, 2nd
artificial general intelligence (AGI)
assigning credit
Atari, 2nd, 3rd, 4th, 5th
Atari Freeway
attention
  double Q-learning
  implementing self-attention for MNIST
    Einstein notation
    relational modules
    tensor contractions
    training relational modules
    transformed MNIST
  machine learning interpretability with biases
    equivariance
    invariance
