multi-head attention
relational reasoning with
attention models
relational reasoning
self-attention models
training
curriculum learning
maximum entropy learning
visualizing attention weights, 2nd
attention models
automatic differentiation
AvgPool operation

B

backpropagation, 2nd, 3rd, 4th
backward() method, 2nd

bandits
contextual
contextual, solving
multi-arm bandit, solving
epsilon-greedy strategy
exploitation
exploration
softmax selection policy
optimizing ad placements with
actions
rewards
states
batch normalization (BatchNorm)
Bayesian framework
Bayesian inference
bell-curve distribution, 2nd
Bellman equation
