hyperparameters
neural networks as Q function
overview of
relational.
See also Dist-DQN.
DRL (deep reinforcement learning), 2nd, 3rd
dynamic programming (DP)
dynamics, inverse

E

edge matrices
edges
efficiency of scaling
Einops package, 2nd
Einstein notation
ELU (exponential linear unit)
empowerment
encoder function
encoder model
entropy learning
enumerate function
env object
env variable
environment
environment, agents interacting with
env.step(action) method
episodic games, 2nd
epsilon-greedy policy, 2nd, 3rd, 4th, 5th, 6th
epsilon-greedy strategy
equivariance
ES (evolutionary strategies), 2nd
evaluate_population function
evolutionary algorithms
as scalable alternative
