  solving contextual bandits
  solving multi-arm bandits
    epsilon-greedy strategy
    exploitation
    exploration
    softmax selection policy
  string diagrams
  value function
MARL (multi-agent reinforcement learning), 2nd, 3rd
mass, center of
master node
matplotlib scatter plot
matrix multiplication
max_episode_len parameter
maximum entropy learning
maxlen attribute, 2nd
MaxPool operation
MCTS (Monte Carlo tree search)
m-dimensional vector, 2nd
MDP (Markov decision process), 2nd, 3rd, 4th, 5th
mean field approximation
mean field Q-learning
mean squared error (MSE), 2nd
measure theory
memory tables
message passing
MF-Q (mean field Q-learning), 2nd
MHDPA (multi-head dot product attention)
MI (mutual information)
MiniGrid library, 2nd
MiniGrid-DoorKey environment
min_progress parameter
mixed cooperative-competitive games

MNIST
  self-attention for
