multiprocessing library
multithreading
mutate function
mutation
mutual information (MI)
MXNet

N

n-armed bandit algorithm, 2nd
natural language processing (NLP)
n-dimensional vector
neighborhood Q-learning

networks
  building
  building with PyTorch
    automatic differentiation
    building models
Neural Network Layer
neural networks
  as policy function
  as Q function
  defined
  policy function using
    exploration
    stochastic policy gradient, 2nd.
    See policy networks; target networks.
    See policy networks; target networks.
next_generation function
NLP (natural language processing)
nn module, 2nd
node matrices
node-feature dimension
