creating policy networks
full training loop
training models
policy networks, 2nd, 3rd
posterior probability distribution
posteriors
PPO (proximal policy optimization), 2nd
Pr(A) function
pred array
prediction errors (PE), 2nd, 3rd
predictive coding
prepare_images function, 2nd
prepare_initial_state(...) function
prepare_multi_state function
prepare_state function
preprocessing
prior probability distribution
prioritized replay
priors
probabilities
distribution of
comparing
computing expected value from
in Python
expectation
of actions
posteriors
priors
variance
probability density
probability density function (PDF)
probability mass function (PMF)
probability theory
probs array, 2nd
proximal policy optimization.
See PPO.
