s vector
SageMaker, Amazon
sample method
sample space
SAMs (self-attention model), 2nd, 3rd, 4th, 5th
scaler (0-tensor)

scaling
  evolutionary algorithms
    communicating between nodes
    efficiency of
    parallel vs. serial processing
  gradient-based approaches
  linearly

self-attention
  for MNIST
    Einstein notation
    relational modules
    tensor contractions
    training relational modules
    transformed MNIST
  models
self-attention model (SAMs), 2nd, 3rd, 4th, 5th
SequenceMatcher module
serial processing
serially running programs
shared indices
sigma squared
simulated data
simulators
soft attention
softmax function, 2nd, 3rd, 4th, 5th
softmax selection policy
sparse rewards
spin property
