Listing 9.14. Adding the agents
Listing 9.15. Finding the neighbors
Listing 9.16. Calculating the mean field action
Listing 9.17. Choosing actions
Listing 9.18. The training function
Listing 9.19. Initializing the actions
Listing 9.20. Taking a team step and adding to the replay
Listing 9.21. Training loop
Listing 9.22. Adding to the replay (still in while loop from listing 9.21)

Chapter 10. Interpretable reinforcement learning: Attention and relational models

Listing 10.1. Preprocessing functions
Listing 10.2. Relational module
Listing 10.3. The forward pass (continued from listing 10.2)
Listing 10.4. MNIST training loop
Listing 10.5. MNIST test accuracy
Listing 10.6. Convolutional neural network baseline for MNIST
Listing 10.7. Multi-head relational module
Listing 10.8. Preprocessing functions
Listing 10.9. Loss function and updating the replay
Listing 10.10. The main training loop

Appendix Appendix. Mathematics, deep learning, PyTorch

Listing A.1. Gradient descent
Listing A.2. A simple neural network
Listing A.3. PyTorch neural network
Listing A.4. Classifying MNIST using a neural network
