Brief contents

1 Bridging the physical and digital worlds

2 Mapping physical systems to a digital representation

3 Sensing the real world

4 Data integration and management

5 Modeling reality

6 Data visualization and dashboards

7 3D visualization and spatial representation

8 Simulation and analysis

9 AI and machine learning integration

10 Digital twins in production

Appendix A. Building a LoRaWAN network

Appendix B. Building a custom IT sensor

Appendix C. Home Assistant

Appendix D. Capturing a 3D model using photogrammetry
