```
{% block content %}
  <img src="{% static 'img/logo.png' %}" height="100">
  <h1>Welcome to RiffMates!</h1>

  <ul>
    <li> <a href="{% url 'news' %}">News</a> </li>
    <li> <a href="{% url 'musicians' %}">Musicians</a> </li>
    <li> <a href="{% url 'bands' %}">Bands</a> </li>
    <li> <a href="{% url 'venues' %}">Venues</a> </li>
    <li> <a href="{% url 'list_ads' %}">Classified Ads</a> </li>
    <li> <a href="{% url 'comment' %}">Leave a comment</a> </li>
  </ul>

{% endblock content %}
```

Use the {% static %} tag to get the URL for the logo file. The argument is the name of the file relative to the STATICFILES_DIR base configuration.

For convenience, some links to the pages you've written so far

Of course, you'll need an actual logo file to make all this work. The sample code includes a simple image, but any image file named logo.png inside RiffMates/static/img will work.

While you're doing some cosmetic work, add a link to the home page into the nav header you created in chapter 6. The following listing shows the modification you need to make to RiffMates/templates/base.html.

Listing 7.14 Adding a Home link to that thing approximating a nav bar

```
<!-- RiffMates/templates/base.html -->
<!-- ... -->
<body>
  <div style="float: right;">
    <a href="{% url 'home' %}">Home</a>   

  <!-- ... -->
```

The new Home link in the nav header of the base template

You're all set! Fire up the development server, and take a look at the results. It should be something like figure 7.7.

We need to make one other small change, now that you have a home page. Inside RiffMates/RiffMates/settings.py, change the values of `LOGIN_REDIRECT_URL` and `LOGOUT_REDIRECT_URL` to `/`. This is a more logical place to send the user when they log in or out without a destination page:

```
# RiffMates/RiffMates/settings.py
...
LOGOUT_REDIRECT_URL = '/'
LOGIN_REDIRECT_URL = '/'
```

With static files working, there is only one content type left: user-uploaded files. That's what's next.

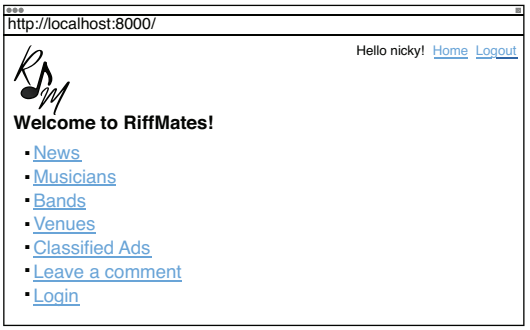

Figure 7.7 Finally, a home page for RiffMates
