Table D.2 ORM field types

Field	Description
`IntegerField(**options)`	This stores an integer in the range of –2,147,483,648 to 2,147,483,647.
`JSONField(encoder=None, decoder= None, **options)`	This stores JSON-encoded data while allowing access to the field as if it were its Python equivalent. This field may not be supported by all databases or may require a plugin for the database. The `encoder` and `decoder` arguments can be used to specify a custom encoder or decored class, according to the `json` module in the standard library.
`PositiveBigIntegerField(**options)`	This stores an integer in the range of 0 to 9,223,372,036,854,775,807.
`PositiveIntegerField(**options)`	This stores an integer in the range of 0 to 2,147,483,647.
`PositiveSmallIntegerField (**options)`	This stores an integer in the range of 0 to 32,767.
`SlugField(max_length=50, allow_unicode=False, **options)`	A slug is a short label used in newspaper articles and is often used as part of a URL. The `allow_unicode` option indicates Unicode values can be accepted— the default `False` restricts slugs to ASCII.
`SmallAutoField(**options)`	This is an `AutoField` restricted to values between 1 and 32,767.
`SmallIntegerField(**options)`	This stores an integer in the range of -32,768 to 32,767.
`TextField(**options)`	This is a large text storage field. The underlying column type may or may not be different from a `CharField`, depending on the database. It uses a `Textarea` widget in forms by default (rendered as `<textarea>`).
`TimeField(auto_now=Flase, auto_now_add=False, **options)`	This is similar to `DateField` but stores a Python `datetime.time` instance.
`URLField(max_length=200, **options)`	This `CharField` validates its contents using a `URLValidator`.
`UUIDField(**options)`	This stores universally unique identifiers from Python's `UUID` class.

D.3 Relationship field types

This section contains the fields that specify inter-Model relationships. All fields support the common arguments described in table D.1. Field-specific arguments are highlighted in the description that follows.
