## D

data migration 318–321
  with existing data 239–243
database
  interacting with 65–68
  testing with 197–201
database-computed values 316
databases 343–344
DATABASES configuration item 343–344
dataclasses library 282
date field 164, 169
| date filter 64
date object 74
DateField 97, 115, 164, 358
datetime object 225
db_constraint argument 362
db_default argument 316
db_index field option 98
dbshell command 71
de_westernize_names() function 241
DecadeListFilter 117
DEFAULT_AUTO_FIELD 217
Delete page 110
.delete() method 80
.dependencies member 235, 238
description field 181
development environment
  editing tools 326–329
  third-party libraries, installing 326–329
diffsettings 217, 230
diffsettings management command 217
DIRS 53–55
distill_path() function 312
distill-local command 312
Django 3–20, 301–302
  community 321
  creating apps 32–33
  creating projects 22–29
  look and feel 307–310
    crispy forms 307–309
    Django Grappelli 307
    favicons 309–310
  ModelForm class 162–175
    editing existing data with forms 172–175
    ModelAdmin for SeekingAd 165–166
    SeekingAdAdmin class 165–166
    SeekingAdForm in view 169–172
    validating fields in model 162–165
    writing 166–168
  overview of 16–20
  parts of 4–15
    databases 11–13
    mapping URLs 8–10
    multiuser sites 15
    structuring HTML for reuse 13–15
  power tools
    feature flags 310–311
    static sites 311–312
  template tag and filter reference 347–355
    loadable filters 355
    loadable tags 350
  testing, Django tests 194–197
  tool libraries 304–306
    Django Awl 306
    Django Extensions 305
  views 33–35
Django Admin 15, 91
  cross-linking between related objects 119–121
  customizing listing pages 113–119
    facets 119
    filtering 115–119
    sorting and searching 114–115
  touring 106–113
    adding models 109–113
    creating admin user 107–108
    default Django Admin 108–109
Django Awl 306
Django Debug Toolbar 302
Django Extensions 305
Django Grappelli 307
Django Ninja 17
Django ORM (object-relational mapping)
  fixtures 99–102
Django ORM field reference
  relationship field types
    ForeignKey 362
    ManyToManyField 362–363
    OneToOneField 363
Django REST Framework 17
Django shell 43–46
django-admin command 22–23, 25, 36
django-admin startproject command 26–27, 38
django-private-storage library 188
django-sendfile2 library 188
django.config.settings module 33
django.contrib.auth.signals.user_login_failed
    signal 151
django.contrib.auth.urls module 139
django.core.mail module 189
django.core.management.base.BaseCommand
    class 221
